Adventure Series

Adventure Series

Designed to Remove Compromises, Not Just Add Extras

The Adventure Series is built for travellers who spend longer off-grid, camp in remote locations, and want confidence that their caravan will keep up with demanding terrain and extended stays.
Adventure goes beyond the basics by addressing the real challenges of remote travel: uneven campsites, limited power, water independence, and long-term durability. Every inclusion is chosen to reduce fatigue, increase self-sufficiency, and minimise the need for costly upgrades later.
This is the series for those who prefer fewer limits, fewer workarounds, and more time enjoying where the road ends.

ADVENTURE Couple and Family Specifications

CHASSIS
